The amendment filed October 19, 2005 has been entered and made of record as paper no. 1005.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Abraham et al (US 2001/0040778 A1, cited by Applicants).

Abraham discloses a method of forming a magnetic memory cell junction comprising the step of patterning a mask layer above a stack of layers and alternately etching and implanting dopants into exposed portions of the stack of layers. Note figures 10-13 of Abraham.

In re claim 21, figure 10 of Abraham teaches the step of etching of the stack of the layers.

In re claim 22, figure 13 of Abraham teaches the step of implanting dopants into exposed portions of the stack of layers.

Claims 1-8 and 23-26 are allowed.

Claims 10-14 stand objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments filed October 19, 2005 have been fully considered but they are not persuasive.

Figure 10 of Abraham teach the step of etching using mask 200 and figure 13a teach the step of implanting ions using mask 500 and therefore, the steps of etching and implanting ions are clearly taught by Abraham. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "a stack of layers is patterned in alignment with a masking layer and an insulating layer is deposited thereafter") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

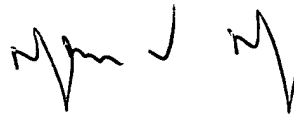

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
